

I'm upset to learn that the FCC is considering allowing LPFM stations to have priority over existing FM translator service. I have enjoyed listening to K-Love radio on local stations for years, & it would be a huge waste of a tremendous asset to the community if the FCC takes away the privilege of listening to K-love. With all of the negativity in the world, why would anyone want to cut off something as positive as K-Love?! It helps me every day to listen to a station that is so upbeat. Parents never have to be concerned that their kids might hear something hurtful, and it can be enjoyed by everyone. K-Love cares for its listeners, & K-Love's listeners care for the station. Please do not take away something so helpful to this community, and to any community, for that matter.
